safe sterile

Stay safe with sempermed® safe sterile, a powder-free nitrile examination glove designed for use in controlled environments requiring a high level of hygiene. It supports procedures where contamination control is essential and provides reliable barrier protection, mechanical strength, and consistent performance. The sterile version is suitable for non-surgical applications requiring validated sterility.

- The good chemical resistance****
 against a wide array of industrial chemicals offers the user enhanced protection and safety.
- The textured surface at the glove's fingertips**
 offers strong grip in wet or dry conditions.
- Strong and durable nitrile material**
 makes the glove suitable for many different uses.
- The force at break** significantly exceeds the EN 455-2 standard requirement**, providing the user with the feeling of special protection.
